- Gather experiences and best practices of participants from different countries

(Very) short round of introduction

- Your name
- Your organization, institution or association
- Your position/ function

Discussion and exchange

What is digital youth work?

Digital youth work is an emerging term to describe the area of youth work that uses digital media and new technology to enhance outcome focused youth development.

Digital youth work should be defined in relation to youth work goals in general, not as a separate project with a separate goal. Digital youth work can be used as a tool for youth development, facilitated by a physical space or an online environment. Digital youth work can also be delivered as an activity and serve as the subject matter or content in a youth work setting.
